

Operating System, Hardware, Channel, Browser and Network Support

Minimum Device Operating System Support

- **Minimum iOS Versions Supported — iOS 17*, iPadOS 17***
- **Minimum Android Version Supported - Android 12.0****

To ensure the highest levels of security, devices that do not support the minimum supported operating system (OS) version may be prevented from installing and/or using the mobile banking app.

OS updates made generally available by Apple and Google at the time of publication of this document are supported by app versions released after the effective date of this document.

Only devices running an unmodified version of the manufacturer-supplied OS are supported.

Note: Beta releases of Apple and Android operating systems are not supported.

* Apple devices that support a maximum OS of iOS 15/iPadOS 15 or iOS 16/iPadOS 16 will continue to be able to download apps from the app store. Any defects that are exclusive to iOS 15/iPadOS 15, iOS 16/iPadOS 16 OS and/or devices that only support OS versions below iOS 17 will not be addressed.

**Android devices that support a maximum OS of Android 11 will continue to be able to download apps from Google Play. Any defects that are exclusive to Android 11 and/or devices that only support OS versions below Android 12 will not be addressed.

Hardware, Channel and Browser Support

- **Android "Developer options" settings, including USB Debugging, are not supported**
- **Jailbroken/rooted devices and MITM interception are not supported**
- **The latest versions of Chrome and Safari browsers are supported. Beta versions are not supported**

Supported App Stores

Apple App Store and Google Play are supported.

Network Support

Mobile Banking only supports TLS 1.2 and higher for app communications. Any device or browser that does not support at least TLS 1.2 will not be able to connect to Mobile Banking services.

The Mobile banking products can operate on any unrestricted TCP/IP data network. Operation on restricted networks (for example, where a firewall might be in place) is not guaranteed.

The Mobile banking product supports Tier 1 carriers in the U.S., including AT&T®, Verizon®, T-Mobile®/Sprint®, and US Cellular®. Mobile banking support for non-Tier 1 carriers depends on the contractual agreement between the SMS gateway provider (aggregator) and the individual carrier.
